Stephanie Geng

Seattle, WA (240) 550-4264 ponyowei@uw.edu

Education

Georgetown University — **Georgetown, Washington DC**
B.S. in Biology of Global Health (Major) and Statistics (Minor)/GPA: 3.83 — *August 2020 - May 2024*

University of Washington — **Seattle, Washington**
M.S. in Biostatistics — *Sept 2026 - March 2028 (Anticipated)*

Experience

Vanda Pharmaceuticals — **Foggy Bottom, Washington DC**
Clinical Project Manager — *June 2024 - August 2026*

- Collaborated with other project managers to lead end-to-end management of a global Phase III trial for a schizophrenia long-acting injectable drug, ensuring compliance with GCP, IRB and FDA guidelines
- Oversaw study start-up, including site selection, contract negotiation, regulatory submission, and site activation across 5 different countries
- Monitored vendor performance and maintained strong relationships with CROs, central labs, EDC suppliers, and other third-party providers

Bansal Lab — **Georgetown, Washington DC**
Assistant Researcher in Disease Ecology — *June 2023 – May 2024*

- Employed Python and R to perform extensive data cleaning and visualization procedures on large-scale COVID-19 datasets to extract meaningful insights on disease dynamics.
- Spearheaded the creation of predictive models for human behavior-driven disease spread, leveraging insights from data analysis and statistical techniques to enhance the accuracy of models.
- Participated in weekly lab meetings to engage in discussions with fellow scientists to share progress, insights, and challenges.

AstraZeneca — **Frederick, MD**
Process Analytical Technology Intern — *June 2023 - August 2023*

- Developed a high-performance liquid chromatography (HPLC) method for the accurate quantification of cholesterol in pharmaceutical products, designing a test with high precision and sensitivity for quality control purposes.
- Acquired proficiency in essential laboratory tools, including electronic lab notebooks, pipetting, and HPLC, contributing to increased efficiency and accuracy in experimental procedures.
- Collaborated with other interns to develop cost-effective measures in the laboratory's inventory tracking methods, resulting in soft savings of $2,000 per year.

Students of Georgetown, Inc. — **Georgetown, Washington DC**
Head of Data Engineering — *January 2022 - May 2024*

- Directed and managed all data related projects for a 500-member student-run nonprofit that runs several coffee shops and convenience stores on campus, overseeing a team of 6 developers to maintain the organization's overall IT infrastructure.
- Initiated and led a comprehensive hiring report project using R and Looker Studio, analyzing demographic data from each class hired for 4 semesters, providing valuable insights for diversity and inclusion efforts.
- Oversaw the development of various platforms for the organization's inventory management using Excel, Tableau, and R, ensuring accurate and accessible information for organizational needs.

Skills

- **Programming tools and Statistical Analysis**: Python, R, Tableau, Linear regression, Data visualization, Data cleaning, Dashboard and report development, Quantitative data analysis
- **Laboratory and Clinical**: HPLC, LC-MS, Electronic lab notebook, Lean Six Sigma Yellow Belt Certification, Clinical trial management, Vendor management, Contract negotiation, Study start-up, CRO oversight, Regulatory compliance (IRB, GCP, FDA)
- **Languages**: English (Fluent), Mandarin Chinese (Proficient)
